

# Staheli Hay Temperature Probe

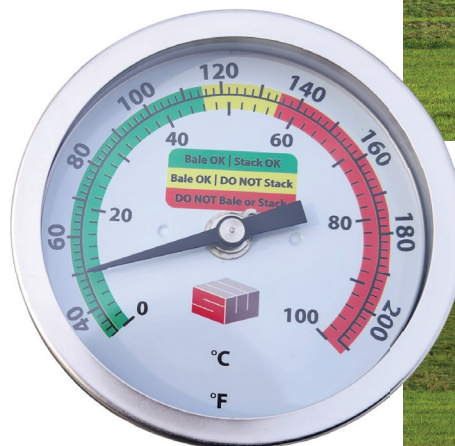

- 19-inch temperature probes
- Dial has green, yellow and red colors for safe, caution, and alert temperatures
- Minus 40 to 210 degrees F temperature range
- 3/4 inch npt fitting under dial to attach to optional T-bar handle
- Packaged 2 probes per box

## Dry hay stack temperature guidelines:

- Ambient temperature and up to 130 degrees is normal.
- 130 degrees F and above: hay is too hot. Move hay and restack. Offset the bales to help cool them down.
- 150 degrees F: Danger zone
- 175 degrees F: Call the fires department
- 185 to 212 degrees F: Expect a fire
